Jan Theulen, Director Alternative Resources at HeidelbergCement

Graduated as Mechanical Engineer, Jan started his career at DSM, a multinational company in the Chemical and Pharma Industry.

He joined the cement industry in 1992 as project manager and moved into developing waste derived fuel programs. He initiated and overlooked the implementation of waste heat power projects in China, Turkey and India and finally the development of solar power plants in UK and Togo.

As Director Alternative Resources for HeidelbergCement he is driving the companies engagement in Carbon Capture and Utilisation by teaming up with promising technology providers in this domain and to collaboratively bring it to commercialization. Focus is on CO₂ to fuels, animal food and building materials.
