

VERAM workshop

Dirk Nelen, researcher at the department for Sustainable Material Management at VITO

Dirk Nelen holds a Master of Science in Biological Engineering (1991). He worked in Chili until returning to his native country, Belgium, in 2010. Since then, he is a researcher at the department for Sustainable Material Management at VITO.

His research focus is on the development and implementation of strategies for waste and materials management in a circular economy, targeting both industries and policy makers.
