

## FLANDERS CLEANTECH INTERNATIONALISATION AWARDS

### RIETLAND

**INTERNATIONAL SUSTAINABLE IMPACT** : Rietland offers natural waste water treatment systems based on constructed wetlands. The already low CO2 production for energy usage of pumps and blowers is partially or completely compensated by the plant growth on the reedbed. Also the O&M costs are very low, which makes this treatment technology very interesting for industries and companies without specialised personnel to operate complicated waste water treatment systems.

**ABILITY TO EXECUTE IN FUTURE – ENABLERS & INHIBITORS** : Our international cooperation in the association 'Global Wetland Technology' gives us international exposure. Also taking part in trade fairs in the Netherlands helps. Internationally, waste water treatment is a growing market, especially for low-tech solutions that can be deployed in low-tech environments (rural area, food and beverage industry, agricultural waste waters). Possible inhibitors might include lack of funding.

#### INTERNATIONAL MARKET TRACTION

##### Turnover – in EURO

(EURO) in 2013	509.721
Total turnover (EURO) in 2014	226.718
Total turnover (EURO) in 2015	331.881

##### Geographical market(s) – in %

- Belgium	75%
- Europe EU – neighbouring countries (GE, FR, LU, NL, UK)	20%
- Europe EU – other	3%
- Middle East	2%
