

Maarten Hommelberg, innovatiemanager, BredeStroomversnelling

Maarten Hommelberg was born in Tilburg, on October 9, 1978. He graduated in the field of building services on the University of Technology in Eindhoven in 2005. He joined ECN to do research in the field of smart grids for three years, after which he joined Vito to become manager of the research domain 'Modeling, optimization and algorithms'. Four years later he joined BAM where he became innovation manager, and coordinator for the H2020 REnnovates project, which aims to bring smart grids to social housing renovations. Another four years later he joined BredeStroomversnelling, which is the organization facilitating the renovation of 2,4 million Dutch houses to zero energy level in the coming years.
