

## **VERAM workshop**

**Milan Grohol holds master's degrees in Mineral processing and environmental technologies from Technical University Kosice, and in Economy and business management from the University of Economics in Bratislava.**

He is a Policy Officer at the European Commission, DG GROW in charge of raw materials and non-energy extractive industries.

His main contributions to the raw materials field in the European Commission since 2004 count: implementing the EU Raw Materials Initiative, including the EU list of Critical Raw Materials; creating and developing the European Innovation Partnership on Raw Materials and the raw materials part of SC5 under Horizon 2020; and supervising several key EU R&D projects, such as Era-Min, Promine, Experl, I2Mine, Biomine.

For several years he had also been responsible for the fields of chemistry, biomaterials and textile production, manufacturing and construction as a Research Programme Officer in DG Research and Innovation.
