

**Stijn verbeke, EnergyVille/VITO**

Stijn Verbeke has a Master degree in civil engineering, and 10 years significant research experience in the field of sustainable building, focusing on assessment methods for energy performance of (near) zero energy buildings and extensive retrofitting of buildings and districts. Within the sustainable building and living team at VITO he coordinates several research projects on sustainable buildings, communities and cities for national and international clients. He is part-time lecturer at University of Antwerp in the fields of building physics and energy performance of buildings.
